

Tsuzuki India Precision

We, TIP continue to grow with our accumulated experience and technology in Japan to exceed customer expectations and creates happiness for our employees.

To the industrial challenges, TIP strives in order to provide advanced solutions.

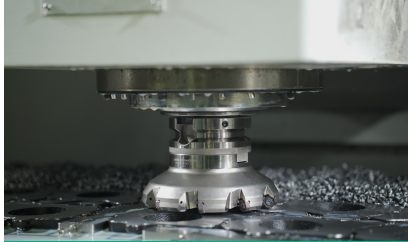

- ✔ In place of issues, how about to mention the advanced solutions?
For Example:
Promising supply chain efficiency

- ✔ Encourage automation with high quality product manufacturing.
- ✔ Automation by efficient people, process and technology.

- ✔ Utilizing enhanced technological capabilities.

Tsuzuki India's commitment towards high quality precision in microns.

Cutting

- ✔ Precision, Machining and Assembly solutions of casting parts.
- ✔ In order to provide cost effective parts, we have built and efficient mass production line in our own factory, utilizing the know-how we have accumulated in Japan.
- ✔ We can respond to orders in microns.

Quality Management

- ✔ Tsuzuki India has introduced quality control using CMMs to guarantee absolute quality.
- ✔ We guarantee the process capability of each and every product.

Traceability

- ✔ We maintain traceability of all our products.
- ✔ Transparent product information exchange is important to encourage our customers challenges.

Professional Team

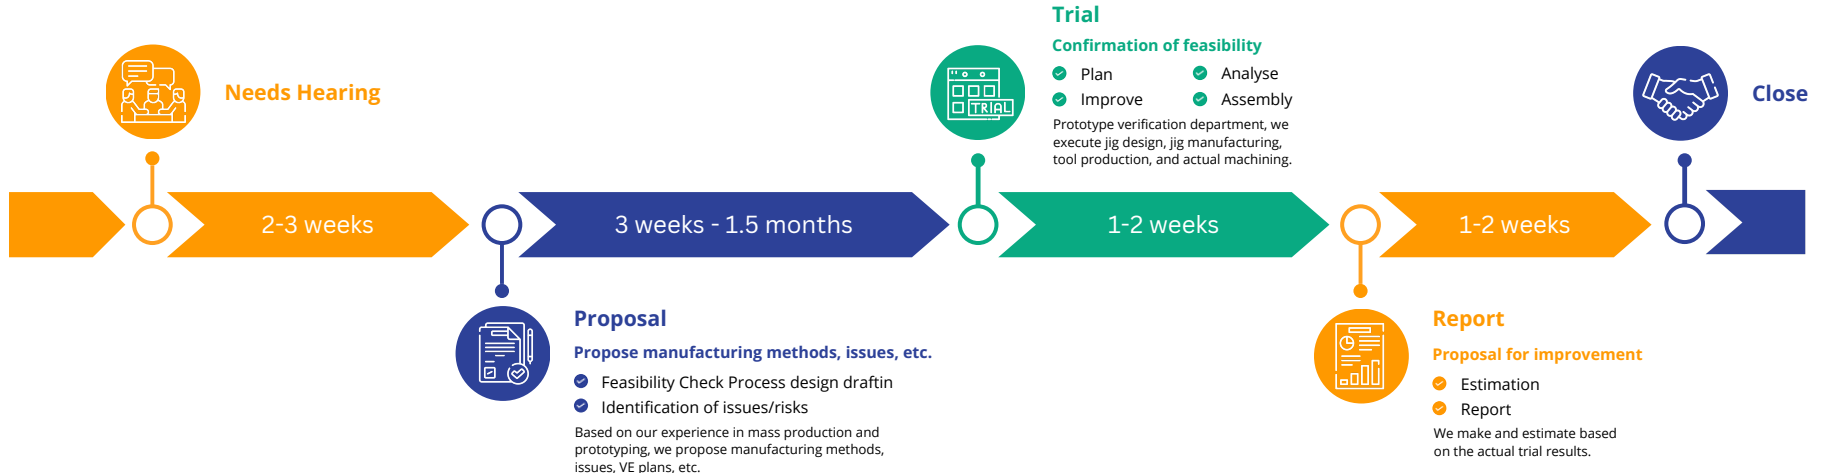

- ✔ The Tsuzuki India team is a group of experts in each department that provides value to our clients.
- ✔ The team is led by Japanese management, which communicates quality and delivery management, and motivates the team.

Development of Our prototypes is based on the principle of value engineering.

Prototyping

- ✓ We at Tsuzuki Co. have absolute confidence in development and design prototyping for components eventually intended for mass production. Our work is founded on principles of value engineering, drawing on our abundant experience with mass production and the processing of automobile components and components for construction machinery.
- ✓ While providing expected functionality and quality, we actively pursue value engineering-based proposals that achieve stronger, more lightweight, more widely functional products as well as reduced costs during the mass production process.
- ✓ We boast high standards of safety for transmission components, suspension / undercarriage components, and similar, while also having achieved double-digit percentage cost reductions for component manufacturing requiring high strength and precision.

Our Vision

Vision

To establish TIP as Indian market leader by providing innovative machining solutions and develop customer oriented system by adopting best business practices & ethics.

Mission

- ✔ To build a team of dedicated, loyal and result oriented people with a positive attitude, striving for excellence through knowledge, hard work and technological upgradation.
- ✔ Expand global customer base through customer oriented approach and with utilization of best technology.
- ✔ Development and design of advanced machining solutions.
- ✔ Contribution in sustainable growth of society with Environmental, Health and Safety Initiatives.

Code of Conduct

SMQCDE

The concept of QCD is considered an important element in the manufacturing industry, at Tsuzuki India we aim to spread the culture of SMQCDE. We have been upholding our own SMQCDE in order for the company to grow to develop better services in a sustainable manner.

Safety

We place safety as our first priority.

Morale

We keep commitments and integrity.

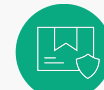

Quality

We guarantee Japan quality in India.

Cost

We minimize cost with Japan production management.

Delivery

We guarantee on time delivery in India.

Environment

We continue sustainable development.

Name	Tsuzuki India Precision LLP
Address	Plot no 16, Street no.- 2, Sector 7A, Reliance MET Village Yakubpur Jhajjar, Haryana India 124103
Employees	90 (as of March 2023)
Capital	1,088 million INR
Major Clients	Honda Motor Co., Ltd. Honda Cars India Limited Komatsu Ltd.
Business activities	<ul style="list-style-type: none">✔ Manufacturing parts for four-wheeled vehicles.✔ Manufacturing parts for construction machinery.

Company Profile Tsuzuki India

- 2016 Founded Tsuzuki India Precision
- 2018 Knuckle production line started for India
- 2020 Acquired IATF16949/ISO 9001
- 2022 Established new factory in Jhajjar - (Reliance-MET)
Hub Carrier production line started for Japan

Company Profile Headquarter

Name TSUZUKI MANUFACTURING CO.,LTD.

Address 6649-1 Sakaki, Sakaki-machi,
Hanishina-gun, Nagano Prefecture,
389-0681

Representative Yuki Kurita, President and representative director

Capital 480 million JPY

Employees 578 (as of March 2023)

- Business activities**
- ✔ Manufacturing of functional components for four-wheeled vehicles, two-wheeled vehicles, and outboard motors (major safety components of the suspension and undercarriage, high-precision transmission components).
 - ✔ Manufacture and function-assurance of engine components and various kinds of hydraulic equipment for construction machinery.
 - ✔ Manufacturing components for the aerospace industry.

Major clients Honda Motor Co., Ltd. Komatsu Ltd. Toshiba Industrial Products and Systems Corporation, Kawasaki Heavy Industries, Ltd. IHI Corporation

1944	Established in Sakaki-machi, Nagano Prefecture
1952	Began conducting business with Honda Motor Co.
1961	Began conducting business with Komatsu Ltd.
1968	Increased capital to 140 million yen
1999	ISO 14001 certification acquired.
2001	PT. TSUZUKI & ASAMA MANUFACTURING (T&A) established in Indonesia
2007	ISO9001 certification acquired.
2010	JS TECH established in Isesaki, Gunma Increased capital to 480 million yen.
2011	Thai Tsuzuki Co., Ltd.(TTC) established in Thailand
2012	T&A Karawang Plant established. T&A ISO9001 certification acquired. TTC ISO9001 and ISO14001 certification acquired.
2014	70th anniversary since establishment.
2015	Yuki Kurita was appointed as President
2016	TS16949 certification acquired at TTC
2017	Indonesia base company name changed (P.T TSUZUKI & ASAMA MANUFACTURING → PT. TSUZUKI INDONESIA MANUFACTURING) Started technical support to Indian subsidiary JISQ9100 certification acquired
2018	Selected as a "Regional Future Leading Company" by Ministry of Economy, Trade and Industry
2020	IATF16949/ISO9001 certification acquired at TIP
2021	New HQ and plant built at TIP MET Industrial Park.
2022	Acquired "Advance Plus" certification, a higher level of certification for workplace IIKI Advanced Company. Established the Micro EV Technology Research Association (METAx) with three manufacturers.

Tsuzuki India is providing suspension parts and hydraulic equipment to the auto manufactures mainly such as Honda Cars India Ltd. which produces a four-wheel and Komatsu Ltd. which produces construction machinery.

We support Indian companies with our quality control system and production process management cultivated to boost rapid economic growth.

Tsuzuki Japan, headquarter was founded in 1944 in Nagano. 80 years ago.

With overseas bases in Thailand, Indonesia, and India, Tsuzuki India is delivering stable quality and production volume. We become a part of our global customers' growth and challenges, and support their international strategies to bring innovation to the entire industry.

Manufactures precision machined transmission and suspension parts for automobiles and various types of hydraulic equipment for construction machinery.

In recent years, Tsuzuki Japan has been participating in the aerospace and defense industries and developing its own brand products.
